TRIGGER
1 INSPECT
2 PLAN
3 VALIDATE
4 ACT + VERIFY
Remediation
existing hygiene debt in scope
Change review
proposed change; adds its diff
Evidence bundle
catalog metadata
dbt schema, manifest
model SQL
parsed SQL facts
1-hop lineage
bounded profile
change diff (review)
content-hashed IDs
Plan (JSON)
≤5 findings: each: claim, evidence IDs, action
LLM agent
calls tools, ≤12 turns, 1 repair turn
Validator
plan schema
asset in scope
known issue type
action class allowed for type
required evidence kinds cited
cited IDs resolve
Patch
override file only; check value = plan, dbt parse
per-issue checks
Propose
review request
Report
finding only
9 read-only, schema-checked tools for planning
catalog, dbt schema, model SQL, SQL facts, manifest node, lineage (2 hops), bounded profile, diff, confined file read
Append-only ledger
findings, evidence IDs, actions, checks
dashed: planned, not implemented
